Understanding Best Practice

At the heart of Early Excellence lies a deep understanding of how young children learn and the importance of establishing a well-planned, rich and stimulating environment to underpin children's personal development and academic achievement.

We offer much expertise to support staff development and specialise in helping practitioners to understand the link between the environment and the curriculum – and how each area of provision can be effectively resourced, organised and managed to create rich and meaningful learning opportunities.

Directed Activities

Curriculum through focused discussion and group activities

Enhanced Provision

Curriculum through resource stimulus, interactive displays, visits and visitors

Continuous Provision

Curriculum through high quality indoor and outdoor learning environments

Highly-engaged learning
with high-quality provision
& skilful adult interaction

“Having grappled for some time to plan out effective provision in an unusual space, we approached Early Excellence for their help. They spent time to get to know our provision and the needs of our children and created a plan to promote more effective learning.

What is special about Early Excellence is the continual support and guidance they offer, and as part of our package of support we accessed training to give staff a deeper understanding of best practice.”
