Strengthening Subject Leaders Knowledge of the EYFS Curriculum Progression Right from the Start

Invest in this newly designed programme of online training for your school and ensure that your Subject Leaders understand how to design and implement a curriculum that starts at the beginning of a child's journey in school.

Through a series of short webinars, each Subject Leader will be:

- Introduced to the core principles of the Early Years and how these are translated into practice
- Gain support to reflect on how these principles affect curriculum design of their subject in Early Years
- Be guided in how to monitor curriculum implementation and the evaluation of the impact on children's outcomes

If you are keen to explore how your school curriculum can be effective from the start of your Early Years - then this programme of training will be a highly valuable resource.

Gain knowledge
to strength
your subject
leadership

"It is important to remember that the curriculum in a primary school starts when children first join in the Early Years, be that the Nursery, Reception class or earlier.

Inspectors will want to understand how knowledge builds in a sequence from the moment children join the school, to the time they leave in Year 6."

Phil Minns
Ofsted HMI

Programme Structure

Part One

Trainer Information

Phil Armstrong
Senior Education
Lead

"Strengthening whole school understanding of early childhood education has always been a personal passion of mine, and so it's a joy to be leading this programme of support for Subject Leaders. With the DfE and Ofsted clearly expecting a school's curriculum to begin when children first join school, this is the ideal time to strengthen staff knowledge and ensure that Subject Leaders understand how to plan a curriculum that fully meets the needs of our youngest children."
